

Illustrated explanation on the special consideration process

Scenario 1: Missing all papers of the subject

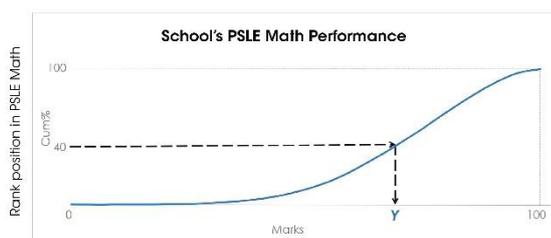

1 Student A missed all papers of the Mathematics subject during the national examinations and has applied for special consideration.

2 Determining Student A's rank position

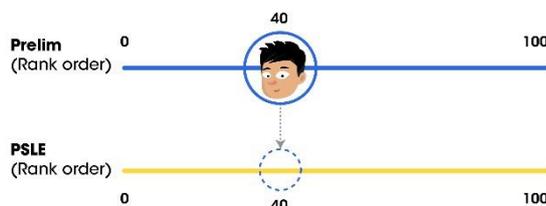

- Student A's prelim results for Mathematics will be used to determine his relative rank position among his peers in the school cohort.
- E.g. Student A's marks in prelim Mathematics is **X** (out of 100), which corresponds to the **40th rank position** within his school.

3 Projecting Student A's PSLE mark based on his rank position

- His rank position in the school will then be used to derive a projected mark for Mathematics in the national examination.
- E.g. Since Student A is in the 40th rank position of his school cohort, his projected mark for Mathematics is Y marks.
- His projected Mathematics mark will be used to derive his Achievement Level (AL)/grades.

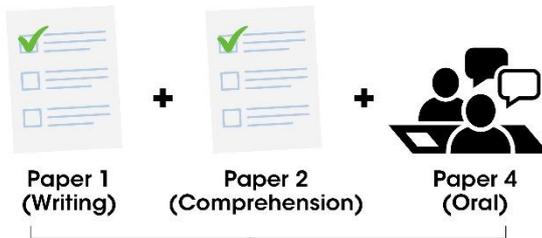

Student A's results for Mathematics during the national examinations will be determined by his relative rank position among his peers in the school cohort during the prelim examinations.

Scenario 2: Missing one paper of the PSLE subject

- 1 Student B missed her Paper 3 (Listening Comprehension or LC) in the PSLE English Language (EL) examination and has applied for special consideration.

2 Deriving Student B's rank position in the PSLE cohort

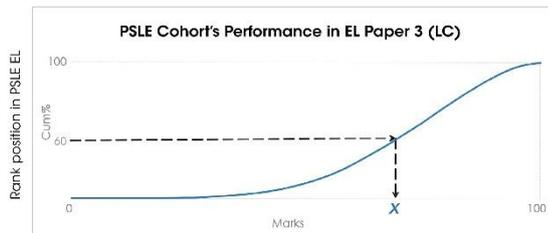

- Student B has taken Papers 1, 2 and 4 in the PSLE EL examination.
- SEAB will use her total marks in the three papers to work out her relative rank position within the PSLE cohort.
- E.g. Student B's performance in Papers 1, 2 and 4 places her at the 60th rank position in the PSLE cohort.

3

3 Projecting Student B's PSLE mark based on her rank position

- This relative rank position will be used to derive her Paper 3 mark (LC) from the cohort's performance on Paper 3 (LC).
- Student B's derived Paper 3 (LC) mark will be added to her total marks for the three other papers she has taken to derive her Achievement Level (AL) for EL.

4 Checking against school prelim results

- As an additional check, SEAB will compare the relative performance of Student B with the other candidates in her school EL prelim examinations.
- If she is ranked at a significantly different position for her school EL prelim examinations as compared to that at PSLE, her case will be flagged for further review.
