

## Holding Sites of Maris Stella High School

### Maris Stella High School (Primary)

**Note:** The permanent site of the school will continue to be used to determine the Home-School Distance (HSD). HSD is calculated based on the shortest distance from any point on the School Land Boundary (SLB) to the registrant's official residential address (based on the approved building footprint). With the rebuilding of the school, there may be changes to the SLB which is used for determining the HSD. Members of the public can use the Singapore Land Authority's (SLA's) OneMap SchoolQuery to check the HSD of an address for the upcoming P1 Exercise. Once information on new residential and school developments are confirmed, they will be updated annually by June into the SLA OneMap SchoolQuery, for the purpose of that year's Primary One Registration Exercise.

### Maris Stella High School (Secondary)
