PRIMARY SCHOOL EDUCATION

Preparing Your Child For Tomorrow
Your Child’s Best Interests at Heart

The primary school years are an important phase of your child’s education. During these formative years, the Ministry of Education (MOE) wants to build every child’s confidence and desire to learn. Our curriculum aims to provide your child with a broad range of learning experiences that will help him to discover his talents and interests.

**PRIMARY SCHOOL EDUCATION AT A GLANCE**
- Six years of compulsory education.
- Subject-based Banding to cater to children with different strengths.
- Co-curricular, Values in Action and many other student development activities to provide a holistic education.
- Primary School Leaving Examination (PSLE) at the end of six years.
- Singapore Citizens need not pay school fees, but a standard monthly miscellaneous fee of $6.50, and a second-tier miscellaneous fee capped at $6.50 are payable.

For more information on school fees payable for your child, please visit [https://www.moe.gov.sg/financial-matters/fees](https://www.moe.gov.sg/financial-matters/fees)

21 SUPPORT AND CONTACT

The Ministry of Education formulates and implements policies on education structure, curriculum, pedagogy and assessment. We oversee the development and management of Government-funded schools, the Institute of Technical Education, polytechnics and autonomous universities. We also fund academic research.
In school, your child will be able to gain the knowledge, skill sets, competencies and values he needs to thrive in the 21st century.

Our Framework for 21st Century Competencies and Student Outcomes encapsulates values and competencies which we have identified as being fundamental in the development of every child. The Framework incorporates:

- **Core Values**
  - respect,
  - responsibility,
  - resilience,
  - integrity,
  - care,
  - harmony;
- **Social and Emotional Competencies**
  - self-awareness,
  - self-management,
  - social awareness,
  - relationship management,
  - responsible decision-making; and
- **21st Century Competencies for a Globalised World**
  They are:
  - Civic Literacy, Global Awareness and Cross-Cultural Skills.
- **Critical and Inventive Thinking**
- **Communication, Collaboration and Information Skills.**

Our curriculum is designed to nurture these values in your child and develop the competencies through various subject disciplines, Character and Citizenship Education (CCE), enrichment programmes, and other learning experiences in school.

The diverse range of Student Development Experiences, such as Co-Curricular Activities (CCAs) offered in each school also provides another platform for your child to acquire and apply these values and competencies, while discovering his interests and talents.

We have also strengthened the quality of Physical Education, Art and Music education for your child’s holistic development. Your child will get to develop physical robustness, enhance his creative and expressive capacities, and shape his personal, cultural and social identities.
Curriculum for Well-Rounded Learning

The primary school curriculum is designed to give your child a strong foundation that includes:
- Nurturing sound values;
- Developing social-emotional competency & citizenship dispositions; and
- Developing literacy and numeracy skills.

The curriculum offered by the Ministry focuses on three main aspects of education – subject disciplines, knowledge skills and character development.

- **Subject disciplines** comprise languages, humanities and the arts, and mathematics and sciences, designed to give your child a good grounding in different fields of study.

- **Knowledge skills** focus on developing your child’s thinking and communication skills. Knowledge skills are taught through a variety of subjects and often through a project work approach. This allows your child to tap his knowledge skills to clearly demonstrate what he has acquired, either individually or collaboratively in a team.

- **Character development** is facilitated through lessons, daily interactions, as well as the different learning experiences planned by the school. These experiences focus on instilling core values, social-emotional competencies and citizenship dispositions in your child. Your child will have many opportunities to develop these values and skills through Character and Citizenship Education lessons, and key Student Development Experiences such as Co-Curricular Activities, Cohort Learning Journeys and Outdoor Adventure Learning Cohort Camps beyond the classroom.

Following the introduction of Subject-based Banding (Primary), your child will be offered English Language, Mother Tongue Language, Mathematics and Science as either Foundation or Standard subjects at Primary 5 and 6, depending on his learning needs and strengths. Students with the aptitude and interest may also be offered Higher Mother Tongue Language.
Language Mastery

**ENGLISH AND MOTHER TONGUE LANGUAGES**

Your child will learn English in primary school. English is the lingua franca of international business, science and technology. Therefore, it is essential for our young to develop a strong foundation in the English Language.

Your child will also learn his Mother Tongue Language (Chinese Language, Malay Language or Tamil Language). Bilingualism, a cornerstone of our education system, has been a valuable asset to our students, enabling them to tap the opportunities that can be found in the global environment.

With more Primary 1 students coming from households where English is the dominant language spoken at home, we will continue to refine the teaching of Mother Tongue Languages. Schools adopt differentiated teaching approaches to cater to students from different home-language backgrounds.

We promote the use of the Mother Tongue Languages, with greater emphasis on listening and speaking skills at the lower primary levels.

**REVISED MOTHER TONGUE LANGUAGE CURRICULUM: KEY FEATURES**

<table>
<thead>
<tr>
<th>CHINESE LANGUAGE CURRICULUM</th>
<th>MALAY LANGUAGE CURRICULUM</th>
<th>TAMIL LANGUAGE CURRICULUM</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Emphasis on listening, speaking, reading and writing.</td>
<td>• Emphasis on interaction skills.</td>
<td>• Teaching tailored to meet the different learning needs of students.</td>
</tr>
<tr>
<td>• Emphasis on interaction skills.</td>
<td>• Emphasis on interaction skills.</td>
<td>• More engaging and appealing teaching materials that capture students’ interest.</td>
</tr>
<tr>
<td>• Modular approach where all students will take the Core Module; students who require more support can take Bridging/Reinforcement Modules; students with interest and ability to go further can take Enrichment Modules.</td>
<td>• Students will have the opportunity to progress to different levels of achievement in their learning.</td>
<td>• Students will have the opportunity to progress to different levels of achievement in their learning.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• Students will have the opportunity to progress to different levels of achievement in their learning. They will also be given more opportunities to practise Spoken Tamil.</td>
</tr>
</tbody>
</table>

Differentiated Learning Environment

**LEARNING SUPPORT PROGRAMMES**

Schools have Learning Support Programmes (LSP) for students entering Primary 1, to ensure that help is provided for those who need it.

The LSP for English provides additional support for students with weak literacy skills. Students attend lessons for one period a day in small groups, and are taught by specially trained teachers using strategies that will improve their reading ability.

The LSP for Mathematics provides additional support to students who need help in acquiring basic numeracy skills. Students are taught in smaller groups during their regular mathematics periods or have supplementary lessons by specially trained teachers.

**PROGRAMMES FOR INTELLECTUALLY GIFTED STUDENTS**

The Gifted Education Programme (GEP) caters to students who are intellectually gifted.

Your child’s school will invite him to participate in a Screening Exercise when he is in Primary 3, as part of a two-stage Identification Exercise, to select students for the GEP.

GEP students will be placed in selected primary schools from Primary 4 to Primary 6. The enriched curriculum in the GEP is built upon the subject syllabi of the regular curriculum, and taught by teachers selected and trained by MOE’s Gifted Education Branch.

GEP students are placed in mixed form classes with their mainstream peers and have many opportunities to learn and play with them during lessons for Form Teacher Guidance Period (FTGP), Mother Tongue Language, Physical Education, Art and Music, as well as Values in Action (VIA) projects and CCA.

Mainstream students with high ability in specific areas will have opportunities to enrich their learning through both school-based and MOE centrally-organised activities during or outside of school hours.
SUBJECT-BASED BANDING (PRIMARY)
Subject-based Banding for Primary Schools begins in Primary 5 and continues till Primary 6.

It provides greater flexibility for your child by offering him the option of a combination of Standard and/or Foundation subjects, depending on his strengths. This will help him focus on and stretch his potential in the subjects that he is strong in, while building up the fundamentals in the subjects in which he needs more support.

HOW DOES SUBJECT-BASED BANDING (PRIMARY) WORK?

AT PRIMARY 4
Student sits for school-based examinations
School recommends a subject combination based on the student’s results.
Parents fill up an option form indicating the preferred combination.

AT PRIMARY 5
Student takes subject combination chosen by parents
English Language, Mathematics, Science and Mother Tongue Language are available at Standard and Foundation levels.
Higher Mother Tongue Language is also available.
School assesses student’s ability to cope with the current subject combination at the end of the year.
Adjustments to the number of Standard and Foundation subjects can be made, if necessary.

AT PRIMARY 6
Student takes subject combination decided by his school and sits for the Primary School Leaving Examination (PSLE) at the end of Primary 6.

Learn Through Play

The MOE has progressively implemented a series of enhancements to primary school education from 2009, which incorporate the recommendations made by the Primary Education Review and Implementation (PERI) committee. These enhancements aim to make learning more enjoyable and meaningful for your child, and seek to develop in him a balance of skills and values.

MORE ENGAGING TEACHING METHODS
Our teachers are adopting more creative teaching strategies in the curriculum to make lessons come to life. For example, your child will be able to learn mathematical and science concepts through investigative tasks and real-life activities, and language skills through role-play and drama.

CHARACTER AND CITIZENSHIP EDUCATION

Character and Citizenship Education (CCE) Lessons
In primary schools, CCE is taught through CCE Form Teacher Guidance Period and CCE Mother Tongue Language lessons.

• Form Teacher Guidance Period (FTGP)
CCE (FTGP) provides opportunities for your child to learn social emotional competencies and values, and for the Form Teachers to build quality teacher-student relationships. Form Teachers play a central role in shaping the development of their young charges. Through lessons that cover content areas such as sexuality education, mental health and cyber wellness, Form Teachers guide students to understand
the physical, social and emotional changes that they experience as they grow up, cope with life’s stresses and develop resilience, explore their interests and strengths, and navigate the cyber world effectively and safely.

- **CCE in Mother Tongue Languages**
  CCE is also taught in Mother Tongue Languages as values are closely intertwined with culture, stories and language. Teachers will provide the necessary scaffolding and guidance to help their students understand and articulate their views in their Mother Tongue Languages.

- **Programme for Active Learning (PAL)**
  To encourage learning beyond the classroom, PAL gives your child the chance to discover new interests, learn new skills and develop his character. Your child will have the opportunity during curriculum time to try out activities in sports and outdoor education, as well as in the performing and visual arts. All primary schools offer PAL to their Primary 1 and 2 students.

**Student Development Experiences (SDES)**
SDES are programmes and activities that contribute towards the holistic development of your child in the physical, aesthetic, intellectual, moral and social domains.

SDES comprise the following: Co-Curricular Activities (CCA); Cohort Learning Journeys e.g. Museum-based Learning; Education and Career Guidance experiences; National Education Commemorative Days e.g. Racial Harmony Day; Outdoor Adventure Learning Cohort Camps; Student Leadership Development Programmes; and Values in Action, including Everyday Responsibilities

Co-curricular Activities (CCAs) are an integral part of a well-rounded education and play an important role in building character. There is a whole spectrum of exciting CCAs for your child to choose from, ranging from physical sports, uniformed groups, visual and performing arts, to clubs and societies. They help nurture in your child qualities such as resilience, cross-cultural awareness, confidence and creativity.

**HOLISTIC ASSESSMENT TO SUPPORT LEARNING**
Assessment is integral to the teaching and learning process.

Holistic Assessment emphasises the development of skills and values, as well as the acquisition of knowledge to enable your child to build greater confidence and nurture a stronger intrinsic motivation to learn. This will in turn help your child to develop his potential.

With Holistic Assessment, schools move beyond tests and examinations, and use other appropriate assessment modes to provide useful information that supports your child’s learning and holistic development.

At Primary 1 and 2, there will be no examinations and weighted assessments* so that your child can ease into formal schooling more smoothly. Teachers will continue to leverage assessments to check for students’ understanding, They will provide timely and targeted feedback to students to move their learning forward, and improve teaching practices, harnessing technology where useful. To provide your child with adequate time and space to adjust to the increased curriculum demands during the Primary 3 and 5 transition years of learning, mid-year examinations will be removed for these levels by 2021.

As parents, you will receive more meaningful and regular feedback that highlights areas where your child has done well, and also ways to improve his learning.

**SINGLE-SESSION PRIMARY SCHOOLS**
All primary schools will be operating at single session from 2022 onwards. This means schools will have more time and space to focus on non-academic aspects such as leadership training and character building.

A single-session structure does not mean a full day of school; it only means an extension of one to two hours on certain days to facilitate your child’s non-academic development. Schools are given the flexibility to plan these activities based on their specific needs.

New infrastructure will be put in place to support these non-academic activities. School facilities and spaces are being redesigned, and this includes outdoor learning spaces and additional venues for performing arts.

* Weighted assessments refer to assessments where the scores form part of the computation of a student’s overall results in a subject for the year.
Choosing the Right School

To help you choose a school that matches the needs of your child, you can consider factors such as siblings currently studying in the school, parental ties, programmes that match your child’s interests, proximity to home, and school culture. Here are some possible considerations when shortlisting schools.

**DISTANCE TO SCHOOL**
A shorter distance from the school to your home means shorter travelling times and reduced transport costs. It also provides better opportunities for you to forge a strong relationship with the school of your choice.

Stronger ties with the school means better co-operation in raising and educating your child.

For a list of schools near your residential address (within 1 km and 1-to-2 km), visit the Singapore Land Authority’s One Map School Query Service (www.onemap.sg).

**MOTHER TONGUE LANGUAGES**
Explore the Mother Tongue Language options offered at the schools of your choice. Parents should note that:

- Chinese Language is offered in all schools
- Malay Language is offered in all except Special Assistance Plan schools
- Tamil Language is offered in most schools, but do confirm this with the schools of your choice.

**YOUR CHILD’S INTERESTS**
Consider your child’s non-academic interests like sports, performing arts, music and technology, and find out if the school you are considering offers activities that match these interests.

- **Co-curricular Activities**
  Schools offer a variety of Co-curricular Activities that include sports and games, uniformed groups, and visual and performing arts groups, and clubs and societies.

- **School-based Programmes**
  If your child has interests in areas such as sports or the arts, you may wish to find out about the schools that offer distinctive programmes in these areas.

**SCHOOL IDENTITY**
Each school has its own unique strengths. Learning about the school will enable you to find out about the:

- School’s vision and mission
- Culture of the school
- Parent Support Groups

**AFFILIATED SCHOOLS**
Some primary schools (mostly those with church/clan associations) have close ties with certain secondary schools, in the form of affiliation.

Your child can enjoy priority for admission to the secondary school affiliated to his primary school, provided he meets the school’s admission criteria, and he indicates the affiliated secondary school as his first choice. Admission priority will only apply to the ‘O’ level track of the affiliated secondary school.

**SPECIAL ASSISTANCE PLAN SCHOOLS**
Special Assistance Plan schools nurture in their students a deep understanding and appreciation of the Chinese Language, culture, values and heritage, and enable them to be effectively bilingual in both English and Chinese languages.

Support for Students with Special Educational Needs

The Compulsory Education Act provides for compulsory primary education in Singapore. Your child must attend a national primary school (government or government-aided primary school or government-funded special education (SPED) school) regularly if they are:

- of compulsory school age (above 6 years old and under 15 years old);
- a Singapore Citizen; and
- living in Singapore,

unless they have been granted exemption. This requirement has been extended to children with moderate-to-severe special educational needs (SEN) born after 1 January 2012, since 2019.

Children with SEN may require additional help and support to adapt socially or learn in school.

Understanding your child’s needs, strengths, and difficulties can help you identify the right kind of support for him. You can find out more about your child’s needs by speaking to your child’s teachers and professionals working with your child. An assessment by a qualified professional is the best way to get a clear diagnosis and recommendation for support. An assessment is also necessary to apply to a SPED school.

Check with your healthcare professional that he/she adheres to the Professional Practice Guidelines on Psychosocial Assessment and Placement of Students with Special Educational Needs, which can be found here: https://go.gov.sg/professionalpracticeguidelines
SUPPORT IN MAINSTREAM SCHOOLS
Support is available in all mainstream schools for students with SEN, such as Dyslexia, Attention Deficit Hyperactivity Disorder (ADHD), mild Autism Spectrum Disorder (ASD), hearing loss, and visual or physical impairment. These students have mild SEN, which allows them to access the national curriculum and learn in large-group settings because of their cognitive abilities and adequate adaptive skills.

All primary schools have teachers trained in special needs and Allied Educators (Learning and Behavioural Support) to help students with SEN integrate into the school environment. Schools also have access to MOE psychologists who provide consultation and advice on supporting these students.

To better help students with social and behavioural needs develop independence in Primary 1, TRANSiton Support for Integration (TRANSIT) will be progressively introduced to schools, where students will learn foundational self-management skills based on their specific needs.

Students with dyslexia are identified at the end of Primary 2 and are supported through the School-based Dyslexia Remediation (SDR) programme at Primary 3 and 4. They can also access the MOE-subsidised Main Literacy Programme conducted by the Dyslexia Association of Singapore.

Students with social or behavioural difficulties have access to school-based structured peer support intervention such as Circle of Friends (CoF), which have seen positive outcomes for students with mild ASD and their peers. Students also have access to referral services like the Response Early Intervention and Assessment in Community Mental Health (REACH) provided by the Institute of Mental Health.

Students with hearing loss, and visual or physical impairment can access itinerant school-based educational support services (ISS) provided by AWWA Ltd and Singapore Association of the Deaf. Assistive technological devices such as Frequency Modulation (FM) equipment, electronic magnifiers, talking calculators etc. are also made available to support students’ learning needs. Designated mainstream schools provide specialised support for students with moderate to profound hearing loss or visual impairment, who are able to access the national curriculum:

- Mayflower Primary School has specially trained teachers to support students with moderate-to-profound hearing loss and who use signing as their primary mode of communication.
- There are also designated secondary schools equipped to support students with visual impairment or hearing loss at secondary level.

You may also access information on the schools in SchoolFinder at https://moe.gov.sg/schoolfinder/.

SUPPORT IN SPECIAL EDUCATION SCHOOLS
Special Education (SPED) schools offer customised curriculum and educational pathways to cater to the diverse needs of children with moderate-to-severe SEN. All SPED schools optimise their students’ potential and abilities – both academic and non-academic – for independent living, continual learning, and meaningful work when they graduate.

There is a range of government-funded SPED schools run by different Social Service Agencies that cater to SEN, including Intellectual Disability, Autism Spectrum Disorder, Physical and Multiple Disabilities, Hearing Loss and Visual Impairment.

The curriculum in SPED schools focuses on developing both academic and non-academic skills including communication and language, numeracy, daily living and social emotional skills, PE and Arts, and incorporates the development of skills in the areas of Character and Citizenship Education and the use of technology.

All SPED schools also offer a Vocational Education curriculum. They also have CCAs and learning journeys and participate in the Singapore Youth Festival and National Schools Games. SPED schools have small class sizes with specialised instruction and in-class support, as well as therapy support services from professionals such as speech and language therapists, occupational therapists, physiotherapists, psychologists and social workers. Every student has an Individual Education Plan (IEP) to support his unique learning needs.

At the secondary level, an Individual Transition Plan is developed for each student based on his interests, preferences and strengths, to support his transition to post-school pathways and positive life outcomes.

A number of educational pathways are available to suit your child’s cognitive and adaptive functioning. Students who can access the national curriculum can do so in SPED schools set up to provide this curriculum.

There are also SPED schools that offer a customised curriculum for students requiring more specialised educational support and vocational education for secondary-aged students.

You can find out more information here: http://moe.gov.sg/special-educational-needs or visit the SPED schools’ websites for information on their respective admission processes.

NEED TO KNOW MORE?
Support Available in SPED Schools
Learn more here: http://moe.gov.sg/special-educational-needs

Financial Assistance for Students Attending SPED Schools
Students attending SPED schools are eligible for the same level of financial assistance as their peers in mainstream schools.

Refer to: https://go.gov.sg/financialassistancespedschools

Transport Scheme for Students with Disabilities
To find out more about transport schemes for students with disabilities, visit SG Enable website: https://go.gov.sg/senablesupportschemes or scan the QR code below.

</tbody>
</table>

*Second-tier miscellaneous fees are decided by schools up to a cap of 100% of the standard miscellaneous fees.

For more information on school fees payable for your child in mainstream schools, please visit https://moe.gov.sg/financial-matters/fees

For more information on school fees for Special Education (SPED) schools, please visit the respective SPED schools’ websites. You may also wish to contact the schools directly for further enquiries.

EDUSAVE SCHEME
The Edusave Scheme maximises educational opportunities for all Singaporean children by providing both the children and schools with funds to pay for enrichment programmes, or to purchase additional resources. It also rewards those who perform well, or who make good progress in their academic and non-academic work.

Your child will receive an annual contribution in his Edusave account, if he is a Singapore Citizen, and aged 7 to 16 or enrolled at primary and secondary levels in MOE-funded schools. The amount contributed for 2021 is $230 for primary-level students.

EDUSAVE AWARDS
The Edusave Awards recognise students’ achievements in academic and non-academic domains and encourage them to continue to excel. Your child may qualify for the Edusave Awards if he is a Singapore Citizen and performs well in the following areas in school.

<table>
<thead>
<tr>
<th>EDUSAVE AWARDS</th>
<th>ELIGIBILITY CRITERIA</th>
<th>VALUE OF AWARD</th>
</tr>
</thead>
<tbody>
<tr>
<td>Edusave Character Award</td>
<td>Up to 2% of students in each school who demonstrated exemplary character and outstanding personal qualities through their behaviour and actions.</td>
<td>• $200 for Pri 1 to Pri 3</td>

</tr>
</tbody>
</table>

EDUSAVE PUPILS FUND
Your child may use the funds in his Edusave account to pay for:
• Enrichment programmes organised by his school; and
• Second-tier miscellaneous fees in government or government-aided primary schools.

FINANCIAL ASSISTANCE SCHEMES
Financial assistance schemes are available to ensure that no child is denied an education because of his financial situation. The MOE Financial Assistance Scheme (FAS) provides needy students with free textbooks, school attire, transport and meal subsidies, and full subsidy of standard miscellaneous fees.

In addition, schools provide discretionary assistance using school-based funds. This school-based assistance can benefit those who do not meet the qualifying criteria for the MOE FAS, as well as provide additional assistance to those on the MOE FAS who need further aid. Parents and students can approach the schools directly if they require financial assistance.

*Per Capita Income is gross monthly household income divided by the number of members in the household.
### MOE FINANCIAL ASSISTANCE SCHEME (FAS) FOR GOVERNMENT AND GOVERNMENT-AIDED PRIMARY SCHOOLS

<td>Subsidies for seven meals per school week</td>
<td>Students taking school bus: 60% subsidy of monthly school bus fares; or Students taking public transport: $15 transport subsidy per month, up to $180 per annum</td>
</tr>
</tbody>
</table>

*Per Capita income is gross monthly household income divided by the number of members in the household.

### OPPORTUNITY FUND

Beyond these financial assistance schemes, MOE provides the Opportunity Fund that our schools can use for the provision of enrichment activities and overseas school trips for Singaporean students from less-advantaged backgrounds. The Fund can also be used to subsidise the purchase of computers to ensure that students in need are not denied learning opportunities.

### Parents and Schools as Partners

Parenting can be an exciting and enriching journey and as a parent, you play a key role in your child’s growth together with the school. Our children do best when schools and parents work hand in hand, with mutual trust and respect. Through a close partnership with your child’s school, you could better understand the needs and development of your child, and give him the necessary care, support and reinforcement at home. The QR code on the left provides some tips on how you can support your child’s educational journey.

When your child enters Primary 1, you will receive a copy of the Parent-Child Activity Book, which is a resource for parents to support their child’s transition from pre-school to Primary 1. The book offers parenting tips and activities to encourage conversations at home. It also helps you reinforce values and routines that your child practises in school. You can also ask your child about a segment titled “Family Time” in his Character and Citizenship Education lessons in school, which promotes parent-child bonding through suggested activities.

Here are some tips on how you can help your child enjoy his learning experience in his early years of education.
HELP YOUR CHILD KNOW HIS SCHOOL ENVIRONMENT

The sooner your child becomes familiar with his new environment, the more positive he will feel about going to school.

• Show them pictures of the school. You can look up the school website for more information or visit its social media platforms to find out more.

• Talk to your child about the new routines he will be going through every day, such as wearing a school uniform, going to the canteen and playing with his peers at recess.

• Encourage your child to practise skills such as asking for permission, buying food, organising his school bag and passing messages between his school and parents.

• Get him excited about new experiences, such as making new friends or learning new things.

• Tell your child whom he can approach for help in school (such as his Form Teacher or School Counsellor) and how he can seek assistance. You can even role-play asking for help with your child.

HELP YOUR CHILD TO LEARN INDEPENDENTLY AND MANAGE HIMSELF

Parents play a key role in shaping the values, skills and habits the child picks up that will serve him well through life.

• Create a conducive learning environment for your child to read and learn.

• Help your child to develop a routine, so that he learns to be responsible for the things he has to do, including homework.

• Encourage your child to do his homework independently – it helps him to learn and it helps teachers understand his learning progress.

• Guide your child in managing his time.

• Discipline your child with empathy and care. Your child’s misbehaviour, though incorrect, may be his best attempt to meet his needs at that moment. Misbehaviours require consequences and correction with understanding and love. Engage the teachers to find out how you can support your child in managing problems and emotions.

• Teach your child to monitor his own behaviour so as to develop self-discipline.

• Be alert to his needs and fears. Seek help from school personnel such as the Form Teacher, School Counsellor, Head of Department overseeing student welfare, Learning Support Coordinator, or other professionals, if necessary.

KNOW AND SUPPORT YOUR CHILD

As your child starts his new educational journey, we need to continue to understand his strengths and interests and support his development.

• Build and strengthen a good relationship with your child. Respect his opinions and listen to what he has to say.

• Talk to the teachers about how you can support your child in adapting to school life during the transition to Primary 1.

• Understand your child’s strengths and weaknesses. Get feedback from your child’s teachers on his strengths and progress in academic and non-academic areas, as well as his behaviour. This will help you understand how to guide him and develop his strengths further.

• Have realistic expectations and achievable goals for your child. Set step-by-step goals to enable your child to achieve them and experience success.

• Avoid comparing your child’s performance with that of others.

• Affirm your child’s efforts – focus on the process, not the achievements, marks or grades.

• Make time to play with your child and enjoy his company.

• Encourage your child, especially when he is disheartened, and help him learn to be resilient.

Registering Your Child for Primary 1

Under the Compulsory Education Act, Singapore Citizens born after 1 January 1996 and residing in Singapore are required to attend national primary schools regularly.

If your child was born between 2 January 2015 and 1 January 2016 (both dates inclusive), you should register your child at the 2021 Primary 1 Registration Exercise for admission to Primary 1 in January 2022. Your child will be at least 6 years old on 1 January at the year of admission.

If your child has been medically assessed to not be ready or suitable for Primary 1, approval for deferment of registration can be considered. More information on deferment application and the relevant form can be found here: https://www.moe.gov.sg/primary/compulsory-education/deferment and queries may be directed to MOE_CEU@moe.gov.sg

2021 PRIMARY 1 REGISTRATION EXERCISE

Please look out for information on the 2021 Primary 1 Registration Exercise and its dates of registration here: https://go.gov.sg/p1reg in May/June 2021.
SUPPORT AND CONTACT

The partnership established between parents and the school will help you stay constantly informed and involved in your child’s progress.

Your child’s holistic development is the focus of our schools’ efforts. Together, we can help your child realise his full potential.

Do keep in regular contact with your child’s teachers and also find out more about the school’s various programmes. Parents keen to serve in their child’s school can consider joining its Parent Support Group (PSG). As part of the PSG, parents will have opportunities to work with school personnel on programmes and projects that will benefit their child and the school.

For the latest news on education and features on schools and teachers, please visit www.schoolbag.sg and download the Schoolbag mobile app available on Apple iTunes Store (for iOS) or the Google Play Store (for Android).

For further information on primary school education, visit MOE’s website at http://www.moe.gov.sg or call the MOE Customer Service Centre at 6872 2220. You can also connect with us on Facebook at http://www.facebook.com/moesingapore.

GET UPDATES ON P1 REGISTRATION PROCESS WITH THE PARENTS GATEWAY APP

Download the Parents Gateway mobile app to receive notifications about Primary 1 registration dates directly from your phone. You can also receive useful parenting resources on choosing a suitable school and ensuring a smooth transition for your child.

This app is one of the ways through which the school will keep you updated on important school announcements. With the app, you can also complete key administrative tasks such as signing of consent forms and travel declarations, anywhere, anytime.

Available on Apple App Store, Huawei App Gallery or Google Play Store from 20 May 2021. Upon successful download, you will be guided through a simple one-time onboarding process.

Scan the QR code to download the Parents Gateway App.
