

ARTIST & TECHNOLOGY: THE ONLINE ART EXHIBITION

Secondary and junior college students can participate in the following SYF 2020 Art Exhibition fringe activities:

a) Co-Canvas

- Facilitated by art practitioners, student participants will have the opportunity to collaborate with art practitioners and other students to co-create artworks. They will also learn to incorporate the use of technology in their artmaking and present their creative process in engaging ways.

b) Curating e-lab

- Led by exhibition curators, student participants will gain insights into the role of a curator and find out more on contemporary curatorial perspectives and practices through an e-mentorship, and hands-on curatorial task.
