

**UPLIFTING
EVERY STUDENT**

“

The UPLIFT Community Network strengthens the support ecosystem for students from disadvantaged families, and addresses school attendance issues early.”

“

We will continue with our plans to roll out the UPLIFT Community Network nationwide to 12 more towns in 2023.

The UPLIFT Community Network complements schools' efforts in two ways: first by roping in community resources to provide supplementary support to students' educational and developmental needs. Second, supporting parents to improve and stabilise the home environment, including having volunteer family befrienders mentor the families.”

STRENGTHENING SUPPORT FOR STUDENTS WITH SPECIAL EDUCATIONAL NEEDS

“From 2023, School Partnerships (Gen Ed–SPED) will broaden and deepen existing partnerships while cultivating stronger and more collaboration between SPED schools and Gen Ed schools.”

“

We will continue to enhance the quality of teaching and learning in SPED schools by launching two additional SPED Teaching and Learning Syllabuses in Communication and Language, and Social Emotional Learning this year.”

“

Full Subject-Based Banding (Full SBB) will be fully implemented in secondary schools for the Secondary 1 cohort from next year onwards. This means that streaming will be removed. This is a significant move in our overall General Education landscape. With this move, students can customise their learning by taking a combination of subjects at different levels, suited to their strengths and pace of learning.”

“

More students will be able to access the Polytechnic Foundation Programme from the AY2028 intake. Today, the PFP is only open to eligible students from the N(A) stream.”

“

We will also adopt a cluster-based admissions approach for the PFP from the AY2026 intake. Students will be admitted to broad clusters, such as Sciences and Humanities, Art, Media & Business, before choosing a specific diploma in the cluster after their PFP.”
